• LinkedIn: https://www.linkedin.com/in/hamza-arif-2795ab60

I have six years of proven experience as a Software Engineer and Team Lead with a Degree in Computer Science. I bring a unique blend of technical expertise and leadership insight to the world of software development. My skill set encompasses a diverse technology stack, including JavaScript, Node.js, PHP, MySQL, Android, iOS, React, React Native, Flutter, Laravel, and DevOps.

As a Team Lead, I've had the privilege of guiding and mentoring development teams to success. I understand the critical balance between efficient project management and fostering a creative and collaborative environment where individuals can thrive and deliver their best work.

In my technical roles, I've tackled various challenges, from crafting robust web applications using modern frameworks like React and Laravel to developing efficient and user-friendly mobile solutions with Android, iOS, and Flutter. My deep understanding of DevOps principles enables me to optimize deployment processes and ensure smooth operations.

WORK EXPERIENCE

| 2021 – current | *Lead Software Engineer* | **Plugd Inc.** | **Lahore (Pakistan)** |

- PLUGD deals with a complete food ordering system that has a lot of features like contactless Dine-in, Pickup, Self-Delivery Solutions, and many more Currently it has more than 200+ registered restaurants.
- Currently, I'm managing the complete system at Plugd and I have a backend in Node JS and a frontend in React JS. I have also some apps that React JS like the rider app and some WebView apps to load frontend pages in apps. The system has been deployed on AWS along with Caddy and other services.

| 2019 – 2021 | *Team Lead* | **Hixol** | **Gujranwala (Pakistan)** |

- I have successfully delivered many projects there like, Gym Passport, Local Cars, ExBizCard, Deliver Cart, and a few more.
- My core responsibilities are to manage the tech team and resolve the problems of the team while developing and delivering projects successfully
  The tech stack in which I have worked while in Hixol is Swift, Java, Xcode, and Android along with back-end APIs in Laravel and PHP and I have also worked on multiple databases.

2018 – 2019   *Software Engineer*   **IBEX**   **Lahore (Pakistan)**

- This was a call center web application that consisted of the complete solution of call center services. It was an old legacy system developed in PHP. TRG has its servers where the complete system has executed. I implement a chat module where the end user and call center members interact with each other in core PHP.
- It was built in PHP and has modules based on Web RTC for call management. I achieved chat in the core PHP system by live helper chat and we also implement a layer between firebase and live helper chat to send messages on mobile

2017 – 2018   *Android Developer*   **OCTA Solution**   **Gujranwala (Pakistan)**

- I have managed various projects at OCTA Solutions which have Digitize Coin mobile applications vending machine applications and a few more.
- I have built these apps in IOS and Android, having JSON and APIs.

2016 – 2017   *Software Engineer*   **World White Tech**   **Gujranwala (Pakistan)**

- WWT is a gaming studio that makes a lot of games for people. We need to make an outstanding platformer game. Web developer platformer game in unity where we implement a physics engine and develop it and it comes with the name of Louis Fortune
- I have built games in Unity Game Studio.
